Re: Testcase, Alex (Claim SYN-2024-001)
Dear Qualified Medical Evaluator:

Please address the following issues from the enclosed fictional packet.

1. Are the medical findings consistent with the February 1, 2024 lifting incident?
2. Please comment on whether the March 28, 2024 MRI supports left L5 contact.
3. State whether the records document any prior lumbar injury.

Very truly yours,

Progress note

June 10, 2024: follow-up after epidural injection.

He is unable to walk more than two blocks before the pain.
She sleeps with difficulty and wakes at night.
He dresses himself without difficulty.
Driving is limited to 20 minutes.

Modified duty continues: no lifting over 10 pounds.

PROGRESS NOTE

Sunrise Spine & Pain Clinic

Progress Note Date: 03/12/2024
